The Sounds of Life: Technology Unlocks Nature's Hidden Realm

with Karen Bakker

Thursday, November 3, 2022 - 6:45 p.m. to 8:00 p.m. ET

Additional Resources

Acoustic Apps

<https://smarteearthproject.com/acoustic-apps/>

We invite you to take a look at these awe-inspiring citizen science apps. They use acoustic data to monitor wildlife activity and promote conservation. You will be amazed at what you can discover!

Digital Listening

<https://smarteearthproject.com/digital-listening/>

We invite you to explore a sampling of non-human sounds like you've never heard before, captured by researchers and digital listening technologies as discussed in The Sounds of Life. These tools have revolutionized the way we connect with the world around us, allowing us to experience non-human conversations with astonishing clarity and detail.

Sound Artists

<https://smarteearthproject.com/sound-artists/>

These artists are exploring environmental issues through sound.

Soundwalks

<https://smarteearthproject.com/get-involved/#soundwalks>

Soundwalks are a way of moving through the world that is attuned to nature's sounds. Explore the practice of deeper listening, and transform your awareness of the world around you.

Get Involved

<https://smarteearthproject.com/get-involved/>

If you find yourself curious and wanting to learn and do more, we have collected a range of ways to get involved with the nature listening community. Uncover non-human conversations, or even get involved as a citizen scientist in gathering, categorizing, and identifying sounds.
