Welcome to the Eden Project

We are an educational charity.

Our mission is to create a global movement that builds relationships between people and the natural world to demonstrate the power of working together for the benefit of all living things.

In the year 2000 we transformed this china clay pit into a global garden. Today we are growing projects nationally and internationally.

A global garden – what’s the story?

The two covered Biomes form the backdrop to contemporary Outdoor Gardens. Living landscapes, exhibits, artworks, trails and live events explore the interconnections between all living things.

Visit:

- The wild places that provide rich biodiversity, fresh air, clean water, climate regulation...
 - The cultivated lands that grow our food, medicines, materials and secure livelihoods...
- We need both, it’s all a matter of balance.

Discover:

- Challenges: biodiversity loss, climate change...
- Solutions: working together and with nature.
- A time of regeneration: healthy planet, healthy people.

The future remains ours to make.

Join as a member and enjoy: unlimited free entry, exclusive offers, all while supporting our charitable work.
