 Smithsonian Associates

Vision/Craft/Expression   Instructor: Eliot Cohen

Additional info for students:

One can create a free Dropbox account for the class and beyond. There is no need for a paid plan. We can set up Dropbox at the beginning of the first class. It's quite easy to use.

Familiarity with Lightroom Classic will be helpful but is not required. The instructor will use Lightroom Classic to demonstrate possible edits of student files. If you have other editing software, you may be able to replicate the edits.

The class should be very helpful for anyone who would like a structured response to images they have captured and edited.
