

## **iPhone Photography II**

**Instructor: Peggy Feerick**

**Email: [pfeerick@gmu.edu](mailto:pfeerick@gmu.edu)**

This two day/5-hour workshop serves as a continuum of the iPhone I workshop. Please take a minute before the class to be sure your ProCamera app is up to date. There are also 4 editing apps I will introduce you to. Please download them before class.

### **Snapseed (free)**

App Icon for Snapseed

### **Touch Retouch (free)**

App Icon for TouchRetouch

### **Lightroom Mobile App (free)**

App Icon for Lightroom

### **Focos App (free, Pro version 3.99/wk)**

App Icon for Focos

**If you have an iPad, I recommend using it for your editing. It makes many procedures much easier!**

### **SCHEDULE:**

**Day I:** We will review the differences between the iPhone camera feature and ProCamera app and delve into ProCamera's advanced controls...in particular, the camera modes (automatic, semi-automatic and manual), exposure bracketing and the histogram feature. After a thorough understanding of these advanced features, the class will examine the advanced features of editing using the app Snapseed and its offerings...Details, Curves, Tonal Contrast and Healing vs. the editing offerings of the iPhone camera app and the ProCamera app. We will finish Day I with a look at the Touch Retouch app as a means of corrective editing, Focos for controlling depth of field, and discuss the class assignment for Sunday.

**Day II:** We'll start with a Q & A session, followed with a continuum on material not covered and/or completed on Saturday, discussing printing techniques and finishing the day with a critique on your photographic assignment.
